Company Profile

Shenzhen Zhuomao Technology Co., Ltd. (also known as "Seamark") was established in 2005 and is a national high-tech enterprise that integrates research and development, production, and sales. It is also a national key "little giant" enterprise specializing in precision, innovation, and novelty. The company has been deeply involved in the industry for more than 20 years and has been committed to providing advanced Industrial CT, X-Ray Inspection Equipment, AOI/SPI, X-Ray Counting Machine, and Intelligent BGA Rework Equipment for industries such as electronic manufacturing, integrated circuits, semiconductors, new energy batteries, and industrial castings.

The company adheres to independent innovation of core technologies, has a professional R&D team, has established a postdoctoral innovation practice base, and has carried out industry university research technology cooperation with research institutions such as Tsinghua University, the Institute of Advanced Technology of the Chinese Academy of Sciences, and Shenzhen University. Currently, it has obtained more than 300 patents and qualification certificates, undertaken the research and development of multiple national key special projects, and has been approved as the Engineering Technology Research Center for Industrial X-ray Intelligent Inspection Equipment in Guangdong Province.

Zhuomao Technology is headquartered in Shenzhen and has established branches and offices in Beijing, Suzhou, Xiangyang, Tianjin, Chongqing, Xi'an, Taiwan, Bangkok and other places, with a complete after-sales service system. Our products cover more than 100 countries and regions worldwide, and have become the preferred trusted brand for over 100,000 users worldwide!

Milestones

Cooperative Partner

2025

- In 2025 Zhuomao Technology celebrates its 20th anniversary
- In 2025 won the Guangdong Industrial X-ray Intelligent Inspection Equipment Engineering Technology Research Center

2024

- In November 2024, a joint laboratory was established with the Shenzhen Advanced Institute of the Chinese Academy of Sciences
- Pass the mid-term acceptance and results release of the national key R&D project in November 2024
- The East China (Suzhou) Exhibition Center will be officially opened in July 2024
- In June 2024, the company will be awarded the title of "Little Giant" with continued financial support for specialized, sophisticated and innovative enterprises
- In March 2023, the company will expand its scale and move from Fuhai Huaide Cuihai Industrial Park to Buildings 10 and 11 of Fuyong Longwangmiao Industrial Park.
- In February 2023, it was awarded the Postdoctoral Innovation and Practice Base by the Shenzhen Human Resources and Social Security Bureau

2022

- In 2022, awarded as a national-level "Little Giant" enterprise by the Ministry of Industry and Information Technology
- In December 2021, won the "Shenzhen Advanced Manufacturing Intelligent Equipment Field Pioneering Bull Award" issued by Shenzhen Electronic Equipment Industry Association for the Socialist Pilot Demonstration Zone
- In December 2021, the industrial CT/3D X-ray inspection system was awarded the "China SMT Innovation Achievement Award" by the Guangdong Institute of Electronics

2020

- In January 2020, Zhuomao was awarded the "Shenzhen Equipment Industry-Leading Enterprise in SMT Segmentation" by Shenzhen Electronic Equipment Industry Association
- In January 2020, the independently developed X-ray Inline Counting Machine was awarded the "China SMT Innovation Achievement Award" by the Guangdong Electronics Society

2019

- In 2019 officially became a qualified supplier of Foxconn
- In 2019 officially became a qualified supplier of Huawei
- In July 2019 Strategic cooperation with Henan University of Science and Technology to create a post-doctoral workstation
- In February 2019, Hubei Zhuomao Intelligent Technology Co., Ltd. was established and formally settled in Hubei Dongjin New District Intelligent Equipment High-tech Industrial Park and put into production
- In January 2019 passed the intellectual property management system certification

2018

- In 2018 officially became a qualified supplier of ZTE
- In December 2018, Mr. Wen Quan, the general manager of Zhuomao, was awarded the "Leading Talent" Award for the 40th Anniversary of the Reform and Opening-up by the Shenzhen Electronic Equipment Industry Association
- In December 2018, the 3D X-ray Inspection Equipment was awarded the "China SMT Innovation Achievement Award" by the Guangdong Electronics Society
- In September 2018, the Micro-focus X-ray Inspection Equipment was granted the exemption management certification by Guangdong Environmental Protection Department
- In October 2017, Zhuomao won the "2017 Guangdong's most competitive enterprise" award

2016

- In October 2016, the laser screen repair equipment won the key support project of "SME Technology Innovation" by Baoan Science and Technology Bureau
- In December 2015, Zhuomao was awarded the title of "2015 Shenzhen Enterprise Cultural Construction Excellent Unit" by the Shenzhen Enterprise Federation
- In November 2015, the general manager Wen Quan was awarded the title of "Top Ten Outstanding Young Persons in Xixiang, Bao'an District"
- In September 2015, the whole relocation from Xixiang Sanwei Donghua Industrial Park to the 10th building of Fuyong Huaide Cuihai Industrial Park, and held the "10 Anniversary Celebration" event
- In June 2015, Zhuomao won the "2014 Guangdong Integrity Demonstration Enterprise" certificate issued by the Guangdong Federation of Enterprises

2014

- In October 2014, Zhuomao won the title of "2014 Deloitte China-Shenzhen High-Tech, High-Growth Top 20 Enterprises"
- In August 2014, it won the "2014 Electronic Equipment Industry Design Red Sail Award" issued by the China Electronic Equipment Industry Expo Organizing Committee

- In August 2013, the general manager Wen Quan was awarded the title of "Outstanding Entrepreneur of China Electronics Manufacturing Industry" by the Guangdong Electronics Society

- In August 2013, Zhuomao won the "China Electronic Equipment Most Innovative Ability Award" issued by the China Electronic Equipment Industry Expo Organizing Committee

- In May 2013, it obtained the "Integrity AAA" certification from the China SME Association and the Ministry of Commerce

- In January 2013, Zhuomao became a qualified supplier of "Epson Technology (Shenzhen) Co., Ltd."

- In January 2013, the first fully automatic BGA Reballing machine in China was born and successfully applied for invention patent and obtained authorization

- In August 2012, Suzhou Zhuomao Optoelectronics Technology Co., Ltd. was established

- In December 2011, Zhuomao won the title of the ninth "Most Potential Shenzhen Famous Brand Enterprise"

- In October 2011, Zhuomao obtained the certificate of "National High-tech Enterprise"

- In March 2011, Zhuomao became a qualified supplier of "Chongqing Space Rocket (Bashan Instrument)"

2010

- In July 2010, Zhuomao registered the trademark "Seamark ZM", and officially became a strategic partner with DIC Corporation of Japan
- In March 2010, it was all selected as a qualified supplier by well-known domestic brands such as Skyworth, Changhong, and Hisense
- In January 2010, it was awarded the title of "2009 Civilized and Honest Business Household" by the Shenzhen Industrial and Commercial Bureau

- In Dec. 2009, Zhuomao was recognized as "Shenzhen Dual Software Enterprise"

- In November 2009, Zhuomao passed ISO9001: 2008 quality management system certification

- In October 2009, Zhuomao Technology (Hong Kong) Co., Ltd. was established

- In July 2008, Zhuomao successfully passed the international CE certification

- In March 2008, Zhuomao established a cooperative relationship with Shenzhen Graduate School of Tsinghua University

- In December 2007, Zhuomao became the designated supplier of Taiwan Gigabyte Technology Rework Equipment

- In April 2006, Zhuomao participated in Nepcon for the first time, and cooperated with well-known IT companies such as Lenovo, Tongfang, TCL, etc.

- In March 2006, the first optical alignment rework station ZM-R680C entered the Tianjin market, Tianjin Daisuke Electronics Co., Ltd. (Korean-owned enterprise)

- In 2005, Shenzhen Zhuomao Technology Co., Ltd. was formally established

XC2000

X-Ray Inline Automatic Counting Machine

XC2000 is an inline automatic counting machine with innovative self-developed AI intelligent counting algorithm software, a counting speed of 12~15 seconds/reel, accurate calculation of the number of materials in the reel, and support for a variety of feeding methods such as fully automatic or manual. The equipment can automatically read codes, label, and review, helping SMT smart warehousing to achieve fully automatic material inventory, improve work efficiency, and save manpower investment.

Product Features

Multiple Loading Methods: Support material truck, AGV automatic loading or manual loading

Automatic Loading and Unloading: Supports 7~15 inch reels, suitable for all kinds of SMD components, SMD devices above 01005

Counting Time: 12~15 seconds/reel, greatly reducing counting time and eliminating unnecessary manpower

Automatic and Accurate Counting: AI intelligent counting algorithm software, fast and accurate counting, counting accuracy up to 99.99%

Global Material Database: About 120,000 kinds of material information have been collected, and the cloud collects new material types and image data from around the world, and regularly updates the AI model for material selection every week.

Automatic Label Printing: automatic label printing, automatic labeling and label review and inspection

Intelligent Operation: With safety protection mechanism, it can effectively ensure safe operation

System Connection: Automatic statistical output of material point data, and real-time interactive data connection with MES/ERP/WMS and other systems

Transcoding Function: Automatically generate customer tags based on the code reading result matching rules

Technical Advantages

Compatible with a variety of loading methods, including trolleys, AGV belts, etc., to meet the various needs of customers.

Product Parameters

Model No		XC2000
X-Ray Tube	X-Ray Tube Type	Reflective sealed micro-focus X-ray source
	Tube Voltage	30-80KV
	Tube Current	200-700 μ A
	Maximum Output Power	56W
	Micro Focus Size	33 μ m
Flat Panel Detector	Flat Panel Type	Amorphous silicon flat panel detector
	Pixel Matrix	3072x3072
	Field of View	427mmx427mm
	Resolution	3.6Lp/mm
	Image Frame Rate (1x1)	1fps
	AD Conversion Digits	16bits
Equipment Specifications	Reel Diameter	7"-15" Tape Reel
	Reel Height	8-80mm / 60-80mm (Manual Counting)
	Minimum Component	01005
	System Docking	MES/ERP/WMS
	Input Power	220V 10A 50-60HZ
	Operation System	Industrial Computer WIN10 64 bit
	Dimensions	L3100mmxW1600mmxH2100mm
	Net Weight	2200KG

XC2000 (High Speed Version)

X-Ray High Speed Inline Counting Machine

XC2000 (high-speed version) is a high-speed inline automatic counting machine with innovative self-developed AI intelligent counting algorithm software, a counting speed of 8~9 seconds/tray, and a turntable with four working positions to achieve automatic loading, code reading, counting, labeling, review and unloading at high speed. It is designed for the electronics manufacturing industry to help SMT smart warehousing realize fully automatic material counting, which can greatly improve work efficiency and save manpower investment.

Product Features

Counting Speed: 8~9 seconds/reel, high-speed counting greatly reduces counting time and saves manpower investment

Automatic and Accurate Counting: AI intelligent counting algorithm software, fast and accurate counting, counting accuracy up to 99.99%

Global Material Database: About 120,000 kinds of material information have been collected, and the cloud collects new material types and image data from around the world, and regularly updates the AI model for material selection every week.

Multiple Loading Methods: support material trucks, AGV fully automatic loading

Automatic Loading and Unloading: Supports 7~15 inch reels, suitable for all kinds of SMD components, SMD devices above 01005

New Four-station Design: Four-station turntable with automatic sorting of defective products

Automatic Labeling: Automatic label printing, automatic labeling and label review and inspection

Data Statistics Output: Can be connected with MES/ERP/WMS and other systems to interact with material data in real time

Transcoding Function: Can automatically generate customer labels based on the matching rules of the code reading results

Technical Advantages

Closely integrated with SMT smart warehousing
